

# ESSENTIAL RELOAD: PREBIOTIC DAILY CREAM

  
LENDAN

**Family**  
BEAUTY

**Ref**  
1241007

**Presentation**

**Applications**

- **Description**

*Prebiotic Daily Cream* suitable for all skin types.

- **Effect**

An absorbent, non-oily daily-use moisturizer with a combination of prebiotics and 24-hour active moisturizers.

- **Properties**

Repairs and protects the skin from everyday external aggressions and boosts tolerance levels.

Combats inflammaging, premature aging linked to skin inflammation through weakening of the immune system, which loses its capacity to control the anti-inflammatory response. This process breaks down the collagen fibers, elastane and extracellular matrix, which becomes apparent through the appearance of wrinkles and aging.

With broad spectrum sun and Blue Light (BLPS) protection.

- **Key components**

**Bio-algae.** This prebiotic compound, with significant nutritional properties (Superfood), has been shown through external studies to have the capacity, not only to boost microbiome balance (prebiotic effect), but also stimulate regeneration of the skin's epidermal cells to produce a revitalizing and rejuvenating effect.

**Inulin and yoghurt dust.** Combines the nourishing benefits of yoghurt with the prebiotic activity of, the already well known, inulin, a polysaccharide of plant origin.

**Hydraskin 24** A super-hydrating complex with a double, short and long-term action, that combines different moisturizing actives (like Hyaluronic Acid and NMF components) to prevent skin dryness and produce a 72-hour comfort sensation.

- **How to use**

Gently massage a small amount all over the face until fully absorbed.

- **Sales arguments**
